***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to a dual damascene structure, classified in class 257, subclass 9.
  - II. Claims 13-32, drawn to a method of fabricating a dual damascene, classified in class 438, subclass 622.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case product as claimed can be made by a materially different process. For example, the dual damascene can be made by a process wherein the second interconnection level is formed on another substrate and subsequently bonded so as to be in contact with the first interconnection level.

3. Because these inventions are distinct for the reason given above and the search required for group I is not required for group II, restriction for examination purposes as indicated is proper.

1. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2812

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
